Considering what it is being used as a reference for (volumes for waste piles), in the ideal world, it would actually be replaced by a field logbook containing the same information. Then the draft/final issue would be moot.

If the logbook is not available, I don't think a statement from the OSC would hurt, but I don't know that it would be backup for the data at hand.

Katharine, It appears that Ref. 9 of the UCC package is still draft. I assume that we can use the draft document if it is referenced in its entirety, but do we need other supporting documentation, e.g., memo or

email from the OSC, regarding its status and the quality of the data?

Sincerely,

Sabrina Forrest
